

Avineon India signs a Memorandum of Understanding with JGC Singapore Private Limited to perform detailed engineering services

Hyderabad, India (April 28, 2005): Avineon India Private Limited (Avineon) signed a Memorandum of Understanding with JGC Singapore Private Limited (JSP), a leading engineering company, for performance of detailed engineering services.

JSP anticipates increased outsourcing of engineering requirements in the coming years. JSP selected Avineon to assist in fulfilling such requirements after careful evaluation including surveys, on-site visits, and executive meetings.

“We are very pleased that JSP has recognized the quality and high service levels of our business, which was a pre-requisite for selection” Said, Karlu Rambhala, Managing Director of Avineon India. “Avineon is looking forward to getting started on a mutually beneficial long term relationship with JSP.”

JSP’s parent company JGC Corporation, Japan, is one of Japan's leading engineering companies, and was established in 1928. Since then, JGC has carried out several projects in Japan as well as overseas, in Asia, the Middle East, Africa, South America, and East Europe. JGC's fields of expertise range from the hydrocarbon area, including gas, oil and petrochemicals, to the general industrial field, including pharmaceuticals and chemicals. From basic planning of the project to design, procurement of materials and equipment, construction and commissioning, JGC has also established local engineering centers in diverse countries to ensure the global scale project implementation. JGC Singapore Private Limited is 100% owned subsidiary of JGC and engaged in serving the Singapore Oil Refinery and other Industrial Markets as EPC Contractor.
